

BattlerGC Pro

Next-Gen Wireless GameCube Controller
with dual wireless technology

Firmware Update Instructions

DO NOT UPDATE YOUR BATTLEGC PRO WHILE CONNECTED TO THE USB DONGLE OR ANY OTHER DEVICE.

MAKE SURE THE USB DONGLE IS DISCONNECTED FROM ANY USB PORTS.

UPDATE ONLY USING THE USB-C CABLE.

1. Download the .zip program, open and extract it on a Windows PC.
2. Plug BattlerGC Pro controller to PC using the included USB-C cable.
3. Open the EXE program and click the "START" button.
4. When the program says update is successful, you can disconnect the gamepad.
5. Once it's done updating, disconnect the cable and your controller is now updated!

NOTE: After updating the firmware, in order to use the digital triggers you must activate the digital trigger mode:

To use the digital trigger buttons on PC, Press "HOME" + "B" and the controller will rumble once indicating the new trigger mode.
