

D6 Dreamcast

Wireless 6-Button Controller
For Dreamcast, Switch, and PC

BE CAREFUL TO NOT MIX UP THE BXW FILES, ONE IS FOR THE GAMEPAD AND ONE IS FOR THE USB RECEIVER

D6 Controller Firmware Update Instructions

- 1. Unplug the Controller**
Ensure the D6 controller is **not connected** to your PC or any USB-C cable.
- 2. Enter Reset Mode**
Use a paperclip or pin to press and hold the **reset button** located in the small hole on the back of the D6. All **4 LEDs** should light up.
- 3. Initiate Bootloader Mode**
While continuing to hold the paperclip in place, **press and hold** both the **center Triangle-shaped button** and the **“+” button** simultaneously.
- 4. Wait for LED Change**
Keep holding all buttons (including the paperclip) **until the 4 LEDs turn off and only 1 LED remains lit.**
- 5. Connect the Controller**
Release all buttons, then **connect the controller to your PC** using the included **Retro Fighters USB-C to USB-A cable.**
- 6. Download the Firmware**
Visit the **D6 product page** on our website and download the latest **D6 Firmware Update file.**
- 7. Extract the Files**
Once downloaded, extract the contents of the ZIP file to your PC.
- 8. Launch the Update Tool**
Open the **Firmware Update program** included in the extracted files.
- 9. Select Firmware File**
In the program, click the **“...”** button (three dots) to browse for the firmware file.

10. **Choose the Correct File** Select the file with **“gamepad” in the name** and a **.BXW** extension, then click **Open**.
11. **Choose the Device** From the dropdown menu in the program, select **Device**.
12. **Start the Update** Click **Download** to begin updating the firmware.
13. **All Set!** Once the upgrade is complete, your D6 controller is ready to use. D6 USB Dongle Firmware Upgrade Instructions

D6 USB Dongle Firmware Upgrade Instructions

1. Press and hold the button on the USB dongle, then plug it into your PC. Keep holding the button until the LED turns off.
2. **Download the Firmware**
Visit the **D6 product page** on our website and download the latest **D6 Firmware Update file**.
3. **Extract the Files**
Once downloaded, extract the contents of the ZIP file to your PC.
4. **Launch the Update Tool**
Open the **Firmware Update program** included in the extracted files.
5. **Select Firmware File**
In the program, click the **“...”** button (three dots) to browse for the firmware file.
6. **Choose the Correct File**
Select the file with **“USB” in the name** and a **.BXW** extension, then click **Open**.
7. **Choose the Device**
From the dropdown menu in the program, select **Device**.
8. **Start the Update**
Click **Download** to begin updating the firmware.
9. **All Set!** Once the upgrade is complete, your D6 controller is ready to use.
