Controller Firmware Update Instructions

If you have issues with your controller not turning on, please update the firmware on your controller with the firmware featured below.

Updating your controller is **not** necessary if your controller is working correctly.

1. Plug the gamepad into your PC with the included Retro Fighters USB-A to USB-C Cable.
2. Open the .exe updater tool.
3. Click on the "... " to select the file.
4. Select the "BXW" file.
5. Click Fresh, select the dongle device.
6. Click Download.
7. It is now updated and back to factory settings.
